

COMPANY OVERVIEW

SanBar Energy Services runs frac sand logistics from origin rail loading through trucking to storage or site, plus bulk water and RO/DI supply for oilfield and industrial operations. We run sand and water from one basin-local team in Pecos, Texas, with shared documentation and one team accountable across the chain.

DIVISIONS & SERVICES

SAND LOGISTICS

- Railcar Management & Origin Oversight
- Transloading & Storage Yards
- Trucking & Last-Mile Delivery
- Inventory Management (Yard & Site)

WATER SERVICES

- Bulk Water Delivery (potable, RO, DI)
- RO/DI Water (low-TDS, lab-tested)
- Water Treatment Systems (design / install / maintain)

SERVICE AREA

Based in Pecos, Texas. We're set up for the Texas Permian and Delaware basins, with capacity planning for additional regions on request. Running in-basin keeps haul distance and cost down.

TECHNOLOGY & DOCUMENTATION

- Status views for railcars and trucks with exceptions
- Electronic tickets, bills of lading, invoices, and audit trails
- Exports via API or files to common ERP/field systems
- Water quality lab results documented per delivery

CREDENTIALS

- TCEQ-Licensed (RO plant)
- ISN Registered
- Avetta Member
- Veriforce Participating
- DOT-Compliant Fleet
- TWQA Member

Placeholder: SES to confirm held credentials before distribution.

NAICS CODES
